

Telehealth Billing Instructions

Telehealth

Telehealth is the use of a telecommunications system instead of an in-person recipient encounter for professional consultations, office visits, office psychiatry services and a limited number of other medical services. Please review [Medicaid Services Manual \(MSM\) Chapter 3400 \(Telehealth Services\)](#) for complete policy, covered services, non-covered services and coverage requirements.

The telecommunications system used must be an interactive audio and video system. Standard telephones, facsimile machines or electronic mail do not meet this criteria.

The **distant site** is the site where the provider delivering services is located at the time the service is provided via a telecommunications system. The provider at the distant site must use modifier GT (via interactive audio and video telecommunication system) when billing for each service that was provided via telehealth.

The **originating site** is the location where an eligible Medicaid/Nevada Check Up recipient is at the time the service is provided via a telecommunications system.

Effective December 1, 2015, telehealth may be used by any Nevada Medicaid and Nevada Check Up provider working within their scope of practice to provide services that can be appropriately provided via telehealth. If the originating site is enrolled as a Nevada Medicaid provider, they may bill HCPCS code Q3014 (Telehealth originating site facility fee). Providers that bill per diem or encounter rates may not bill HCPCS code Q3014, because the facility fee is included in the per diem/encounter rates. If the telecommunication system used is a recipient's smart phone or home computer, the facility fee may not be billed.

Covered services

Code	Description
Q3014	Telehealth originating site facility fee
